

## Transform your computer into a payment processing solution

Offer customers choice, enhanced security and convenience while capturing more business online and at the point-of-sale

Worldpay Virtual Terminal offers payment processing choice and control through an internet connection and browser. Virtual Terminal is part of Worldpay's complete payment solutions portfolio that ranges from payment terminals to sophisticated omni-channel solutions.

### Accept payments anytime, anywhere

Worldpay Virtual Terminal processes card payments in real-time anywhere, anytime – without significant costs or resources required. Your business can accept credit cards and debit cards. Your business can also issue refunds and void purchases quickly.

### Boost security for your business and customers

This solution offers user and transaction security options to minimize fraud risk such as Point-to-Point Encryption (P2PE), tokenization and EMV. By adding certified peripheral devices, security features are also extended to the moment a card is entered.

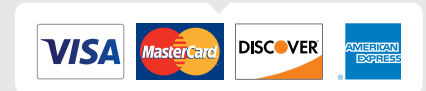

### Customizable options to help manage your business

Worldpay Virtual Terminal includes customizable features such as automated billing (recurring, installment, variable) and real-time reporting. We have experts available 24/7 to be a partner in your success.

## Let's Get Started

We would welcome opportunity to talk about your business needs and how Worldpay Virtual Terminal can help you achieve even greater success. Please visit us at [www.worldpay.com/us/virtualterminal](http://www.worldpay.com/us/virtualterminal) for more information.
