

Payout

Payout opportunities
without borders

One partner, multiple payout options

The eCommerce market is growing at a staggering rate. In fact, research shows that sales are expected to reach \$4.5 trillion in 2021.¹ That's why it's important to have a payment provider that you can rely on.

As consumer behaviour evolves, so will your need to payout. We understand that merchants are required to send funds to consumers and suppliers. That's why Worldpay offers a suite of services so you can process payouts with flexibility and ease. Whether your priority is speed, reach or user experience, we have the right solution for you.

Which payout solution is right for you?

With Worldpay, you don't need to select just one payout method, you can choose several depending on your needs.

Card disbursement

If you want to make super-fast payouts to consumers and suppliers, we'd recommend Visa Direct. It allows you to transfer funds into a recipient's Visa card quickly, conveniently and securely.

Bankout

If you operate an international business and need to payout in several currencies across the globe, you might prefer Bankout. It's a far-reaching solution that makes worldwide payments simple, inexpensive and transparent.

Mobile Wallets

Improve the consumer experience with Apple Pay and Samsung Pay, which both do away with payment and address entry. We're able to allow disbursement of funds to a recipient's original payment method, Apple Pay or Samsung Pay, without requesting additional information or saving bank details.

Whatever your priority, we'll help you find the right payment service.

Make payments faster than ever before with card disbursement

Thanks to the rise of digital services and the growth of the sharing economy, consumers and suppliers expect faster and more convenient ways to pay. As a result, they expect the same service when receiving funds. That's where we come in.

Visa Direct allows you to transfer funds into a recipient's Visa card quickly, conveniently and securely. Thanks to our strong partnership with Visa Direct, we're able to offer you this service at a global scale. You'll be able to enhance the user experience and make payouts in multiple currencies.

Visa Direct is for any Worldpay merchant that wants to pay consumers and suppliers quickly.

For example

If speed is important to your business, once users have stored their card details with Visa Direct, the money goes straight into their account in as little as 30 minutes.¹

In the future, Worldpay is looking to introduce other card disbursement options and will be adding even more currencies to expand your payment choices across the world.

Enabling seamless cross-border payments with Bankout

Cross-border eCommerce is booming, and online marketplaces are a key driver of this trend. They can make it easier for merchants to expand internationally by improving localisation and logistics.

Research estimates cross-border eCommerce will grow at twice the rate of domestic eCommerce until 2020.² So if you're a cross-border business, you'll need a payment solution that's up to the job.

Bankout is Worldpay's most established payout service. It uses our extensive network of global banks to make worldwide payments simple, inexpensive and transparent.

Thanks to Worldpay, you can payout in around 90% of the world's domestic currencies and deposit funds straight into consumers' bank accounts without having to open one yourself in each country you wish to payout in. Plus, you can save your business money by minimising cross-border transaction fees.

Bankout is perfect for Worldpay merchants that want to pay consumers and suppliers around the world with ease.

For example

An international taxi company could use Bankout to seamlessly link all transactions between the business, its drivers and consumers. Consumer payments can be collected wherever in the world they may be, in a given currency, and settled to drivers in their local currency. It's that easy.

Enhance the shopper experience with Mobile Wallets

Shopping online with mobile devices is shaping the future of the eCommerce market. Research reveals that the global Mobile Wallet market was worth \$594 billion in 2016 and is projected to reach \$3,142 billion by 2022.¹ That's a growth of around 32% each year,¹ therefore it's important that merchants are able to payout to consumers with their favourite Mobile Wallet.

Worldpay offers payout capabilities through some of the most popular Mobile Wallets – Apple Pay and Samsung Pay. Merchants are able to deliver a superior user experience by paying out to consumers using the same payment method that they originally used.

For example

If you are a retailer looking to refund a consumer for a return, you don't need to ask for any additional information, removing any friction and improving consumer satisfaction. The same is true if you're a merchant operating in the gambling industry looking to payout winners securely, quickly and efficiently. Not only is it handy for them, but it's convenient for you too.

Why choose Worldpay's solutions?

Speed

Pay recipients faster than ever before with card disbursement

Reach

Make payments around the world with Bankout

User experience

Deliver a superior consumer experience with Mobile Wallets
